

Keynote Speaker: John K. Graham – Intergraph Corporation, President, Security, Government & Infrastructure

Presentation Duration: 30 minutes

Speech Title: Innovations in service delivery: How Intergraph geospatial technology enables ground breaking security and efficiency outcomes

Keynote Speech Abstract:

SG&I uses proven world class technologies to improve processes and results in mission-critical applications in a wide range of industries, including public safety, transportation, government, defense, utilities, and communications. SG&I understands better than most of its competitors that, in these uncertain economic times, customers desire solid investments that meet ever-increasing end user needs with constrained resources. John Graham, President of SG&I, will discuss how SG&I has helped high-profile organizations make strategic, high-return technology investments that deliver operational benefits, help secure physical and human assets, and enable public safety.
